

UNSOLVED MURDER!

Reconstruction of Victim

Unidentified White Female Homicide Victim

Case History

On October 24, 2003, the victim was discovered off Devil Dog Road about one mile south of Interstate 40 and six miles West of Williams, Arizona. The victim was killed in another location from a single blow to her head. It is estimated that she had been dead from 3 days to 2 weeks.

Vital Statistics

Estimated age: 55 - 65 years old

Approximate Height and Weight: 5'4"; 150 lbs.

Distinguishing Characteristics: Short gray hair with some blonde; brown eyes. Her nails were beautifully manicured. 1/4" square mole above left side of forehead, mole on tip of right shoulder, mole over left collarbone, mole on front of right lower leg, and mole over the middle part of the right ankle. There is a strong indication of heart disease as she had a marked amount of atherosclerosis with 70% blockage in the left coronary artery. She also had calcification in the peripheral arteries which indicates that she could have been a heavy smoker or a diabetic or both. She did not have pierced ears or any tattoos and there were no apparent tan lines.

Dentals: Extensive dental restorations in excess of \$20,000 and did not clinically exhibit active decay. Significant restorations include a 3 unit bridge from #18 to #20 replacing #19, and a 3 unit bridge from #28 to #31 replacing #29 and #30, #31 has drifted mesially (toward the front). Teeth # 3, 5, 11, 12, 14, 18, 20, 21, 28, 31, and 32 are all porcelain to metal crowns. Tooth #15, has a full gold crown. Root canals have been performed on tooth # 5, 11, 14, 15 18 and 31.

Clothing: None

Fingerprints: The victim's fingerprints were obtained but they were not of great quality and so far no match has been found of the victim with either the FBI or State of Arizona.

DNA: Available
