Physical activity can help manage many health problems.

- ✓ Reduce symptoms of arthritis, anxiety, and depression
- ✓ Help keep diabetes and high blood pressure under control

Just getting started?

No problem — start slow and do what you can. Even a 5-minute walk has real health benefits. Build up to more activity over time.

Mix in stretches and activities to improve your balance, too! Keep your body flexible and help lower your risk of falls.

And all sorts of activities count.

Even things you have to do anyway

Even things that don't feel like exercise

You can get more active.

No matter your age, you can find a way that works for you.

So take the first step. Get a little more active each day. **Move your way.**

Find tips to get moving and build a weekly activity plan.
