

Memorandum

DATE: July 1, 2020

TO: Coconino County Public Works & Community Development Departments

FROM: Nick Hall, Assistant County Engineer

CC: Lucinda Andreani, Public Works Director; Jay Christelman, Community Development Director; Christopher Tressler, County Engineer, John Carr, Engineering Supervisor

SUBJECT: Fiscal Year 2021 Road Cut Moratorium Update

All:

The Fiscal Year 2021 Road Cut Moratorium list is complete and is ready for publishing to the public.

Background

Coconino County is committed to preserving its paved road infrastructure system. Utilizing funds from the Prop. 403 Road Maintenance Sales Tax, the County invests approximately \$8,000,000 each year for maintenance, pavement preservation, and capital improvement projects that will extend the service life of this infrastructure to the fullest extent possible.

The County's Road Cut Moratorium is intended to safeguard this taxpayer-funded investment by minimizing the impact of failed repairs and improving the smoothness on County roads that residents and visitors must use every day. Through research of other counties and municipalities throughout the country, it is clear that trench cuts significantly alter and degrade pavement surfaces adjacent to and within the actual trench line. When pavement cut repairs fail, the County is left to cover the costs of additional repairs.

In an effort to better manage pavement degradation from the effects of utility cuts, Coconino County has enacted a 3-year moratorium on all newly chip sealed surfaces and a 7-year moratorium on all paved surfaces. Chip sealed surfaces include chip, fog, slurry, scrub sealing and micro-surfacing of at least a half street or greater. Paved surfaces include overlays, reconstruction and new construction of at least a half street or greater. If utility work is required to cross sections of road under moratorium, then all utility infrastructure must be bored or pushed under the pavement. Water boring in not permitted under a paved roadway.
